DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stropko (5,378,149) in view of Riitano (6,069,979). Stropko shows the claimed needle assembly except for the angle-adjustment sleeve. Riitano shows a needle assembly comprising a needle 170 fixed in an angle-adjustment sleeve 160 (see Figure 7). It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the needle assembly of Stropko with an angle adjustment sleeve, as taught by Riitano, so that the needle may be made more flexible to enable it to adapt to the curvature of the canal (i.e. the adjustment of the angle is done by the sleeve thus allowing the needle to be more flexible).

Allowable Subject Matter

Claims 16 and 17 are allowed.

Response to Arguments

Applicant's arguments filed May 24, 2002 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a device wherein the needle itself may be bent by use of the angle adjustment sleeve) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Claim 18 only sets forth an angle-adjustment sleeve surrounding a portion of the sleeve. It does not specify that the needle is bent to adjust its angle.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory

Art Unit: 3732

period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
